PROJECTS

Home Automation, Link, Erode, India   **Feb 2024 — Mar 2024**

- Developed a cutting-edge home automation system utilizing ESP8266 microchip and relay modules, programmed using Arduino IDE. This project enabled remote control of household appliances and lighting, enhancing convenience and energy efficiency. As team lead, orchestrated the integration of various sensors and actuators, ensuring seamless functionality. Presented the project on a live TV show to an audience of 10k, showcasing its potential to revolutionize modern living through IoT technology.

Pay Track, Link, Erode

- I had the opportunity to present my project, PayTrack – Personal Expense Manager, at my college project viva. It was an incredible experience showcasing my work, receiving valuable feedback, and discussing how this app can help individuals manage their finances more efficiently.

Quiz Appz, Guvi-Project, Link, Erode, India   **Jun 2025 — Jul 2025**

- I'm proud to have developed and deployed QuizAppz, a full-stack Role-Based Online Quiz Application, marking a key milestone in my technical growth. This project allows admins to manage quizzes and participants to take them with instant scoring, enhanced by email notifications.
